

JAMES R. FOUTS, MAYOR

**Water Division**  
12821 Stephens Road  
Warren, MI 48089  
(586) 759-9200

**Thomas C. Pawelkowski**  
Superintendent

## Modification of Meter Size in Residential Buildings

If a request is made to downsize a water meter from a 1” meter down to a 5/8” meter, the following conditions must be met:

The owner of the property must purchase a 5/8” water meter from the Water Department. All meters are the property of the Warren Water Division and no refunds will be issued. Should the owner decide to change his/her meter back to 1” size at a later date, he/she will be required to purchase a new 1” meter. There will be no credit given for his/her old meter.

Original meter sizes were determined according to the fixture demand and flow requirements at the time of original installation. All plumbing must comply with the “Michigan Residential Code 2000”. It is strongly recommended that the owner consult with a “licensed Master Plumber” or “Registered Plumbing Engineer” to ensure that the proper size meter is being requested. Please be advised that by signing this document the owner agrees to these conditions and will not hold the City of Warren responsible for any problems, which may emerge because of this meter change.
